

Medipad

Have you ever had disappointing experiences with using functional pads? While I can't disclose the product name, during the development process, we also experienced many disappointing products through comparative testing.

MediPad is a product developed to safeguard the ordinary but precious daily life of both caregivers and their furry companions.

Extremely Convenient Health Check!

We are unveiling **MEDIPAD™** !

MediPad

User feedback

What are the advantages of MediPad?

Smart Partner *Medipad*

Sometimes, it was uncomfortable when urine got on my feet, but MediPad has excellent absorbency, so urine doesn't get on my feet.

Luna

Other products had weak absorbency and leaked to the side, which was unpleasant. However, after switching to MediPad, I am very satisfied.

Max

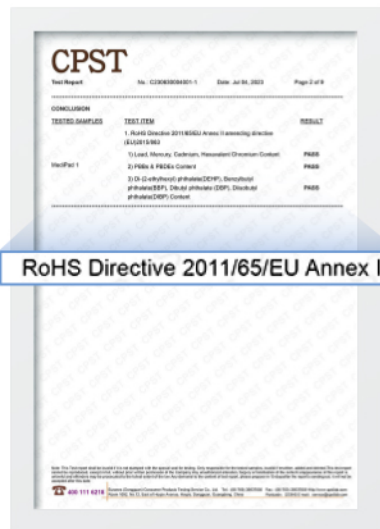

I check both urine and health with MediPad, it's a win-win. It is waterproof and doesn't wet the floor, which is great.

Daisy

Use it with confidence!

Safety

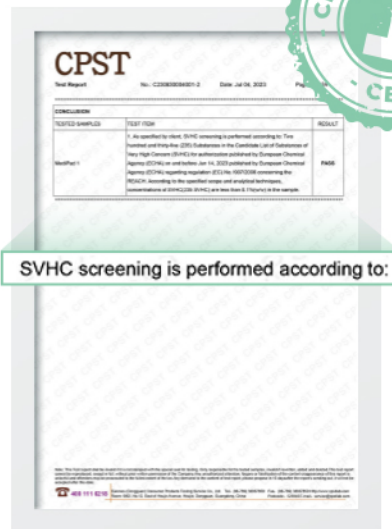

We used the **same raw materials as infant diapers** and have completed **all safety tests**.

RoHS TEST

Testing of **6 types** of hazardous substances.

Pass!

SVHC TEST

Testing of **235 types** of hazardous substances.

Pass!

Why

Medipad is special

Simple health check with App

It's a smart defecation pad that can easily and easily check your dog's health every day.

Strong absorption power

It contains super absorbent SAP, which is 3 to 4 times more absorbent than regular bowel pads!

Fast Absorption for a Clean Pet Environment!

It quickly absorbs and doesn't leave urine on your pet's paws, helping to maintain a clean space!

The Range of Choice in Two Sizes

Medium Size: 40cm x 50cm
Large Size: 60cm x 76cm

Cost-effective! **POINT**
1 *Time-effective!*

MediPad!

Enhancing Your Pet's Well-being

What you want to hear from your pet

I'm Fine!

Why is Canine Urine Testing Necessary?

DOG ISSUE

Renal Disease

Cystitis

Urinary Stones

More than 75%

Kidney Function Loss at the Onset

One of the most common ailments in dogs, lower urinary tract disease, **can be treated if detected early through regular urine tests.**
Please protect your beloved pet's prime health!

Check it out
Is the pad pattern pink!

So Easy!

Medipad is set to respond to weak alkalineuria, an early reaction to urinary system abnormalities, helping to quickly determine symptoms.

Medipad is a simple urine test pad that checks the degree of alkalization of urine. It is not a disease diagnostic kit and provides casual data.

Please check your dog's urine with MediPad once or twice a week. If the MediPad turns pink, kindly consider temporarily discontinuing any snacks for your dog and monitor their diet for approximately 3 days, providing only their regular feed. If the MediPad continues to change color, it is advisable to consult your veterinarian.

Don't be surprised that the pad turned pink!

When dogs eat alkaline foods such as fruits and vegetables,

they may temporarily urinate alkaline urine.

Manage it
 with a MediPad only APP!

POINT
2

Premium American Pulp and Ultra SAP

Meticulous 6-layer design for rapid absorption

Urine reaction cover

Ultra SAP

100% pure wood pulp

PE waterproof film

#01

Diamond embossing pattern

**Ensure Quick Absorption,
No More Worries about Leaks!**

MediPads, with their **unique pattern and structure, rapidly absorb urine upon contact, resulting in significantly less surface wetness compared to competitors' products.**

#02

Rapid Absorption Power, Even for Large Volumes of Urine!

Ultra SAP effectively **absorbs 1000 times more moisture** and turns it into a solid gel. Therefore, urine does not remain on the surface but is absorbed and fixed inside, **thereby minimizing odor.**

SAP Content

Medium-sized
Weight 22g | SAP 4g

Large-sized
Weight 59g | SAP 7g

The weight of SAP is very light due to its polymer nature. The weight of most pads primarily comes from the pulp. However, what determines absorbency is the performance and content of SAP. Don't simply be deceived by weight when making your decision

Comparing Absorption Capacities

Competing brand pad

VS

MediPad

POINT
3

Thick and Luxurious Premium American Pulp

It boasts a thicker construction and superior absorbency compared to other pet pads

We've compared it on an equal size basis.

Incomparable level of thickness

It's thicker than other pet pads, not only aiding in rapid absorption but also providing a comfortable user experience

POINT
4

Waterproofed with a PE Film for Full Protection

The edges are designed to prevent any urine leakage.

POINT
5

Adhesive tape to prevent slipping

Have you been disappointed by the actual performance of traditional slip-resistant coated pads? MediPads are manufactured using a 4-way direct adhesive method. Since it uses a silicone adhesive, it doesn't stick to the floor and is safe to use."

Try out the exceptional **non-slip performance** of MediPads for yourself.

POINT
6

Refreshing Lemon Scent

Lemon

"During the toilet training process, your pet will remember the lemon scent and learn to eliminate in specific areas, while our product neutralizes odors to create a comfortable environment."

**Experience a subtle lemon scent
that's not overpowering**

POINT
7

Cost-effective pad options to ease your expenses !

Size: 40cm x 50cm

Quantity: Test Pads 10 Pcs
Standard Pads 90 Pcs

100 Pcs

Size: 60cm x 76cm

Quantity: Test Pads 3 Pcs
Standard Pads 22 Pcs

25 Pcs

We've reduced the cost by offering the test pads in a 1/10 ratio, providing you with a more budget-friendly option. By doing so, we aim to ensure that the price remains affordable, making it easier for many pet owners to monitor their pets' health.

Moreover, we've maintained the fundamental performance of our standard pads while enhancing the product's value with unique advantages."
